***Response to Amendment***

***Claim Rejections - 35 USC § 103***

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1-9, 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shimamura et al (US 4737153) in view of Adler (US 4158916). Shimamura discloses a reinforced catheter comprising an elongate flexible body 4 having a tip 2 with a plurality of openings 8 formed in the wall of the catheter, and a rigid helical support element 6 embedded in the wall (Abstract).
3. Independent claim 1 differs from Shimamura in calling for a cage member. Adler teaches a surgical suction catheter comprising an elongate flexible catheter having a cage member 34 formed of a mesh screening having a plurality of longitudinal stringers and a plurality of annular rings in a common cylindrical plane disposed about the intake apertures 16, 18, 20, 22 to permit free flow of fluids into the catheter and to prevent tissue or particulate matter from being drawn into the catheter (Col. 2, lines 50-55). Therefore, it would have been obvious to one of ordinary skill in the art at the time of invention to modify the catheter of Shimamura to include a cage member as taught by Adler to prevent the apertures from becoming clogged, thereby maintaining an open flow of material through the catheter.

Art Unit: 3763

4. Regarding claim 6, Adler teaches that an additional set of apertures 32 formed in a spaced relation to the tip to provide for a more uniform suction. See Fig. 9.

### ***Response to Arguments***

5. Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
